

Vylix Demo Material

Chapter 1: Vectors and Matrices

A vector is an ordered list of numbers.

A matrix is a rectangular array of numbers.

Chapter 2: Matrix Operations

Addition: $A + B$ (element-wise)

Multiplication: AB (row by column)

Transpose: A^T (swap rows and columns)

Chapter 3: Determinants

$\det(A) = ad - bc$ (for 2×2 matrix)

$\det(A) = 0$ means singular matrix
